Security is critical for any organisation. Blue Apple Partner Payroll security goes far beyond what most companies have been able to achieve for themselves. Using the latest firewall protection, SSL encryption, and proprietary security products,

Blue

Apple

Payroll

gives you the peace of mind that only a world-class security infrastructure can provide.

Security is a multidimensional business imperative that demands to be considered at every level, from security for applications to physical facilities to network security. Below is an overview of how we handle security at various levels.

There are 3 benchmark reasons for utilising this facility:

Blue Apple Payroll protects your data by ensuring that only authorized users can access it.

1. Protection at the Application Level
